

# PHP DEVELOPER

**Job Role:** PHP Developer

**Job Location:** Hyderabad

**Experience:** 3-5 Years

## Job Description:

We are looking for a PHP Developer responsible for managing back-end services and the interchange of data between the server and the users. Your primary focus will be the development of all server-side logic, definition and maintenance of the central database, and ensuring high performance and responsiveness to requests from the front-end. You will also be responsible for integrating the front-end elements built by your co-workers into the web application. Therefore, a basic understanding of front-end technologies is necessary as well.

## Responsibilities:

- > Integration of user-facing elements developed by front-end developers
- > Build efficient, testable, and reusable PHP modules
- > Solve complex performance problems and architectural challenges
- > Integration of data storage solutions (may include databases, key-value stores, blob stores, etc.)

## Skills And Qualifications:

- > Strong knowledge of PHP web frameworks (such as Laravel, Yii, etc depending on technology stack)
- > Build, test and set up cutting-edge website applications in an efficient matter; work with other developers to fill data acquisition requirements
- > Identify and fix CSS, HTML and scripting compatibility issues between a variety of platforms and browsers; test websites on different browsers and mobile device browsers; correct problems identified.
- > Investigate and discover architectural considerations, such as web usability, site performance and database design, as part of the system design process; research and assess implementation alternatives for new application features
- > Understanding the fully synchronous behavior of PHP
- > Understanding of MVC design patterns
- > Basic understanding of front-end technologies, such as JavaScript, HTML5, and CSS3
- > Knowledge of object oriented PHP programming
- > Understanding accessibility and security compliance
- > Strong knowledge of the common PHP or web server exploits and their solutions
- > Understanding fundamental design principles behind a scalable application
- > User authentication and authorization between multiple systems, servers, and environments
